

WHY TAKE CEH-CERTIFIED ETHICAL TRAINING?

The Certified Ethical Hacker (CEH) will only be considered as White Hats if they are fully certified by the EC-council CEH, (The international Council of E-Commerce Consultants). This certification is called C/EH or Certified Ethical Hacker. This is obtained through specialized training and an examination. The certified ethical hacker certification can be renewed every three years and the recent version is CEHv9, CEH v10.

Who Should Take CEH-Certified Ethical Certification Training?

CEH training is critical for security professionals; you need to think like a hacker but use your skills lawfully to uncover and repair system vulnerabilities. We've developed an ethical hacking course boot camp that introduces the concept of key security tools and perimeter defenses — then leads students into scanning, hacking and compromising networks in an immersive, interactive environment.

CEH training will fortify the application knowledge of security officers, auditors, security professionals, site administrators, and anyone who is concerned about the integrity of the network infrastructure. CEH candidates will be immersed in an interactive network hacking environment where they will be shown how to scan, test, hack and secure their systems. Candidates will begin by understanding how perimeter defenses work and then be led into scanning and attacking their own networks.

CEH candidates then learn how intruders escalate privileges and what steps can be taken to secure a system. Candidates will also learn about Intrusion Detection, Policy Creation, Social Engineering, DDoS Attacks, Buffer Overflows, and Virus Creation. Learn the art of penetration testing (pen testing) to create a network intrusion vulnerability prevention strategy.

Listed as a component of the United States Department of Defense Directive 8570, CEH is a respected certification in the industry.

What Jobs Can You get with CEH-Certified Ethical Certification in DC?

Are you intrigued by the world of digital forensics? Our combined CEH + CHFI training class is designed to take you from a novice cybersecurity practitioner to a fully certified forensic investigator, quickly and at a great price.
