WHY TAKE COMPTIA A+ TRAINING?

CompTIA A+ certification is the foundation for your IT career. This program provides the skills and training you need to support and troubleshoot technology problems across a wide range of networks, operating systems, and device types. This Program, with its focus on supporting and troubleshooting PC and mobile operating systems, will also enable you to configure networks with internet access and client device networking. This is a vendor-neutral certification making your knowledge applicable everywhere.

Successful candidates learn the skills and knowledge to take customer requirements and assemble components, install, configure and maintain devices, and software for end users. Our hands-on approach will give you the confidence to handle basic networking and security/forensics. It will also teach you to properly safely diagnose, resolve and document common hardware and software issues. Key to roles utilizing the A+ certification is the ability to troubleshoot issues, provide appropriate help-desk support, and to comprehend the fundamentals of virtualization, desktop imaging, and deployment, all of which we teach in-class in a convenient location to you, whether in Maryland, Virginia, or DC.

In job opportunities that the A+ program prepares you for, it is essential that you have the confidence to handle real-world situations. Quantom Studios' uniquely hands-on approach prepares you for those practical, real-world situations, as well as how to pass the certification exams.
